One is to offer one thing away without cost along with your book, similar to a useful bonus item. Or bundle a number of ebooks underneath one value, which lowers the price for every e-book if they had been sold separately.

An efficient method for figuring out a value is to ship out a survey to your present customers. If these customers have already purchased an book from you, ask for their opinion when it comes to price. Do that by creating a gross sales web page for the new book, but do not embrace a value on that page. Instead, add quite a few links to survey questions that ask pointed questions to help you in assigning a price to your ebook.

One other technique is to check out costs by making a number of duplicate gross sales pages with completely different prices on every page. Be certain your sales copy is strictly the same on each web page, and consists of your selling-deal with sentence. Then determine for each web page the conversion ratio between guests to your website and sales of your book. This may inform you what your optimum price is.

In the end, if you happen to've written a book that solves a problem or presents a brand new approach, your e book will bring in both visitors and profits.
